

Product Description

MS-93050P is a Sampling Swab with Polyester Tip & PS stick used for cell, virus and microbe specimen collection, and it also has been used for clinical diagnostics. Swabbing is one of the most widely used methods for microbiological examination of surface, so it has been used for bio-pharmaceutical industry, food-hygiene and cosmetics industry too. The head is made of medical grade polyester, it is high density and no easy to fall off, the PS handle is with suitable firmness and high resilience. The design is perfect and it is easy to use, the tip is harmless to micro-organisms, thus it would enhance the specimen collection.

Product Specifications

Item No.	Dimensions of Polyester tip			Dimensions of PS stick	
	Diameter 1	Diameter 2	Length	Diameter	Total length
MS-93050P	4.5 mm	2.5 mm	16.5 mm	2.5 mm	149 mm

Product Picture

Sterilization Process

We take EO Gas sterilization for MS-93050P and take Gama Ray sterilization for Transport Mediums & Kits.

Product Description

MS-VP006A is a Sampling Swab with Viscose tip & **PP** stick used for cell, virus and microbe specimen collection, and it also has been used for clinical diagnostics. Swabbing is one of the most widely used methods for microbiological examination of surface, so it has been used for bio-pharmaceutical industry, food-hygiene and cosmetics industry too. The head is made of medical grade viscose, it is high density and no easy to fall off, the PP handle is with suitable firmness and high resilience. The design is perfect and it is easy to use, the tip is harmless to micro-organisms, thus it would enhance the specimen collection.

Product Specifications

Item No.	Dimensions of Viscose tip			Dimensions of PP stick	
	Diameter 1	Diameter 2	Length	Diameter	Total length
MS-VP006A	4.2 mm	2.5 mm	16.5 mm	2.5 mm	149 mm
