

Product Descriptions

MS-FBS001 is a buccal Swab with toothbrush shape cheek & convenient push rod, it has been designed for the DNA & Genetics detection. It is made of medical grade needle-punched fiber and ABS handle, the fiber head is harmless to the cell & micro-organisms, thus can enhance the specimen collection capacity. It is a perfect buccal Sampling Swab for the specimen collection and the operation is easy, just press on the push rod to eject the head into the transport medium after finishing the specimen collection. It has been well recognized by many well-known Genetics detection companies.
